Maze 8

A complex maze with a thick black path leading from point S to point F. The maze is contained within an irregular, blob-like boundary. The path starts at point S, located at the bottom center, and ends at point F, located at the bottom right. The path is a single continuous line that winds through the maze, avoiding walls. The walls are represented by thin black lines forming a grid-like pattern. The path is significantly thicker than the walls, making it stand out. The overall shape of the maze is roughly circular with several protrusions and indentations. The path starts at a small circle labeled 'S' and ends at a small circle labeled 'F'. The path is a single continuous line that winds through the maze, avoiding walls. The walls are represented by thin black lines forming a grid-like pattern. The path is significantly thicker than the walls, making it stand out. The overall shape of the maze is roughly circular with several protrusions and indentations.
